Overview Renfert extraction units for CAM milling machines

Status: 07.03.2023

Performance Data	SILENT compactCAM	SILENT powerCAM TC	SILENT powerCAM EC
Volume Flow (max.)	2,500 l/min / 1.47 ft ³ /s	3,980 l/min / 2,34 ft ³ /s	3,984 l/min / 2.34 ft ³ /s
Suction Power	27 m/s	36 m/s	37 & 36 m/s
Max. Depression	219 hPa / 3.2 psi	281 hPa / 4,1 psi	257 hPa / 3.73 psi (230 V) 262 hPa / 3.8 psi (120 V) 255 hPa / 3.7 psi (100 V)
Guaranteed motor lifetime	1,000 h	1,000 h	5,000 h

The SILENT compactCAM, powerCAM TC & powerCAM EC are particle and dust extraction units especially designed for CAD/CAM milling machines.

The SILENT compactCAM, powerCAM TC & powerCAM EC are compatible with CAD/CAM milling machines where:

1. The CAM manufacturer's technical requirements for extraction units are fulfilled.
2. The SILENT compactCAM / powerCAM TC / powerCAM EC can be switched on/off either manually or over the Renfert interface cable. Never switch the extraction units on/off when they are connected to the electrical relay control of the CAM machine. Doing so can lead to serious damage of the extraction units.
3. The list of extraction unit models is for orientation purposes only. As the requirements of the particular milling machine are important in selecting the correct extraction unit, please consult the CAM manufacturer.
